

San Miguel Left-hand to Right-hand Conversion Procedures

The only tool necessary for these procedures is a high quality #1 Phillips screwdriver.

- a) Remove the spool from the frame by pressing the release button in the center of the spool cap.
- b) Loosen the two captive Phillips spool cap screws.
- c) Remove the Spool Cap Assembly from the spool.
- d) Flip over the One-Way Clutch Assembly. It is marked on with the direction of the retrieve facing up.
- e) Place the Spool Cap Assembly into it's original position.
- f) Tighten the two captive screws.
